We are the only practical firm in the Islands today, strictly in the monument business. We do all our work with pneumatic tools, driven by compressed air, and the saving in labor we give it our customers in the reduced price of monuments sold. We give any class of lettering, V Sun or raised, but recommend raised letters as more artistic. We sell monuments at San Francisco prices, and as a further inducement to purchase from us, we will give the full name, and the year of birth and death, beautifully carved in raised letters, in panel work, with frosted background, absolutely free. We are direct importers of American and Scotch marble and granites.

**POULTRY POINTERS**

Kerosene the roosts.  
Work for the future.  
Tell us your experience.  
Have regular feeding hours to feed.

Dampness is to be prevented at all times.

A liberal use of whitewash is beneficial.

One bad egg is a thorn in your reputation.

It is what you feed that counts in results.

Always have fresh, pure water before your fowls.

When the little chick's wings begin to drop look for lice.

Rats are a bad thing when they take quarters in the poultry house.

In breeding be careful not to drop utility points to get standard.

The incubator needs closer watching now than in cold weather.

A little linseed meal in the soft feed once in a while is very beneficial.

The character of the food has much to do with the quality of the eggs.

Always have plenty of grit before your fowls, remember it is their teeth.

Most poultry houses need no ventilators. They have to much ventilation now.

Do not keep more breeds of poultry than you can keep to breed in strict purity.

Respect the brooding hen. Harsh methods should never be used to break her up.

If hens lay soft shell eggs it indicates they are too fat, feed less and keep them busy.

Pullets and hens will lay just as well without the attention of a male bird as with one.

High feeding and lack of exercise is the cause of a good many infertile eggs in the spring.

Pure breeds will give better returns than the mongrel deadbeats tolerated by our grandparents.

Eggs for the market should be clean, they look better and sell better, and dirt should be removed.

In mating for breeding, be careful to have the male excel in points that are deficient in the females.

Oatmeal is a good food for little chicks, but must not be feed too freely as it is apt to cause bowel trouble.

Study your birds and breed them so as to bring the egg record up. Quick growth, early maturity. It will pay you.

A filthy drinking vessel is a good place for disease to take root. Always keep it clean and filled with fresh water.

Be careful about letting the heat run too high in the brooder as an overheated chick never attains the size it should.

Don't undertake more than you can do. Better raise less birds and give them better care, which means better birds, more eggs and more money.

If its paper you want, long articles to read, and not to-the-point articles, you will need a fifty center or a dollar journal. Poultry Pointers cannot fill the demand.

The hen—she is capable, when well bred, fed and cared for, of turning a given quantity of raw material into more dollars and cents than any other animal on the farm.

No one who is not a close observer need expect to make a success in the poultry business. You must study your fowls, learn their ways, and work for their comfort, and also keep them busy.
